Why We Have Seasons – (The Old 2025 Canadian Farmers Almanac)

The seasons occur because, as Earth revolves around the Sun, its axis remains tilted at 23.5 degrees from the perpendicular. This tilt causes different latitudes on Earth to receive varying amounts of sunlight throughout the year.

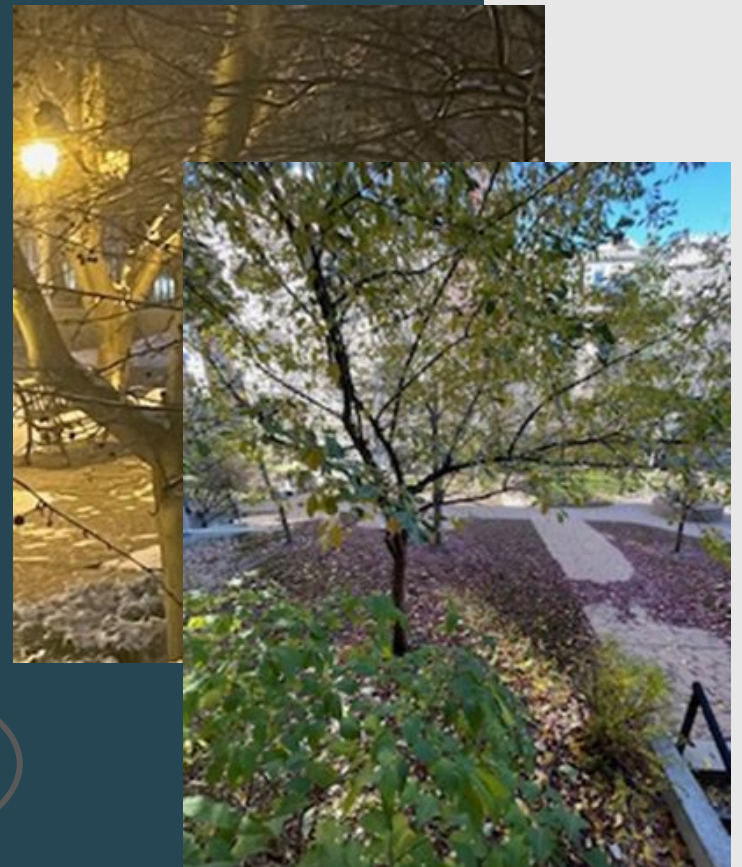

The First Days of the 2025 Seasons:

Vernal (Spring) Equinox – March 20th.

Summer Solstice – June 20th.

Autumnal (Fall) Equinox – Sept.22nd

Winter Solstice – Dec.21st
